

Plan a one-day trip in Kazbegi

Cultural sights, Natural sights Mtskheta-Mtianeti

Overview

- Stepantsminda, also known as Kazbegi, is the pride of the mountainous Georgia, one of the mesmerizing regions of the country. The special beauty of Kazbegi is also witnessed by his location, he is immersed in the gorge of the Terek River, and over his head rises Mkinvartsveri with silvery graying snow. This land is awarded not only by natural wonders, but also rich in cultural monuments, which are in incredible harmony with nature.

Why should you travel with us?

- Because, Kazbegi is a place where you break away from reality, and around it a wonderful beauty is revealed. At the sight of the temple of the Gergeti Trinity and Mount Mkinvartsvi erected on the hill, your spirit will be captivated, and you will dream of extending this moment.

Tour Description

Important information

- Ananuri is a XVI century castle complex on the Aragvi River in Georgia, about 45 miles (72 kilometres) from Tbilisi. Ananuri was a castle and seat of the Eristavis (Dukes) of Aragvi, a feudal dynasty which ruled the area from the 13th century. The castle was the scene of numerous battles.
- The temple of the Gergeti Trinity dates back to the 14th century, with its remarkable composition it merges with the landscape and is the pride of ancient Georgian architecture. For the construction of the temple and the bell tower, a high mountain in the gorge of the Terek river is chosen so that it serves as the backdrop of Mkinvartsveri. On this white background, the silhouettes of the constructions are clearly visible.
- Daryal Gorge is another pearl of Kazbegi. The gorge is remarkable not only for its enchanting nature, but also for the new monastic complex, which is an outstanding example of modern architecture. The Archangel Complex, which was built in a beautiful gorge, is in harmony with the environment, which fills the visitor with impressions.
- The waterfall of Gveleti is another beauty of the Daryal Gorge, which is located in the village of Gveleti, at 1560 meters above sea level and its height is 45 meters. The waters of the waterfall form another narrow beautiful gorge, which has a pleasant and spectacular sight for nature lovers.
- Travertines of Bidara Gorge are located in Kazbegi, on the Gudauri-Kobi road. River Bidara is right tributary of the Terek River. Travertine is a form of limestone deposited by mineral springs, especially hot springs. Travertine often has a fibrous or concentric appearance and exists in white, tan, cream-colored, and even rusty varieties. It is formed by a process of rapid precipitation of calcium carbonate, often at the mouth of a hot spring or in a limestone cave.
