

## Tskaltubo resort

## Natural sights Imereti

Tskaltubo is worldily famous balneological resort which is situated in the west of Georgia, 100-120 meters above sea level. It is functional throughout the whole year. Balneological nature of thermal waters of Tskaltubo has been known during centuries, although, the place started functioning as a resort only in 1926. Temperature of the waters here is +33-35 degree Celsius . Thermal water is used for bathing, inhalation and spraying. Thermal waters are very effective for treating rheumatism, joints, nervous and cardiovascular diseases. Near the resort Tskaltubo Cave is situated which is one of the most remarkable caves with its scales in Europe.
