

Visit capital of the ancient Kingdom of Colchis, Kutaisi

Cultural sights, Natural sights Imereti

Overview

Kutaisi is the second capital of Georgia. The city that creates the country's industry, and also impresses the visitor with a variety of cultural and natural monuments. The edge is rare, which is awarded with such opportunities. Here the old culture with modern, unique nature monuments with artifacts of many thousands of years old are harmoniously intertwined.

Why should you travel with us?

- For making a journey through time - you will discover the trail of dinosaurs,

you will see a centuries-old karst cave, in which stalactites and stalagmites blind you with a multicolored illumination.

Tour Description

Important information

- Bagrati Cathedral - a clear indicator of the greatness of Kutaisi. It has been a visiting card of the city for centuries. Bagrati Cathedral, its architectural and artistic value, occupies an important place in the history of Georgian architecture, as a work that confirms the final style of the times of the developed Middle Ages. Historically, it is a symbol of the united Georgia.
- The Gelaty Monastery - another monument of the architecture of Georgia in period of greatness, it was built in the time of David the Builder, is one of the reasons for pride, and to this day stands proudly, unshakably and pleases the heart of every visitor. The painting of the monastery adds even more charm to the Gelati monastery, since the mosaic executed on its walls is unique and does not occur in other churches.
- Motsameta - a monastery, which is surrounded by the magnificent nature of the gorge of the Tskaltsitela River, attracts the visitor not only with outstanding landscapes, but also with the fact that here are buried the imperishable relics of holy martyrs for the Christian faith, the brothers David and Konstantin Mkheidze. This fact reinforces the desire to visit Motsameta.
- The reserve Sataplia is a place that nature has multilaterally rewarded. The name "Sataplia" means "the place of honey", indicates the excess of bees and honey. In addition, this is the place where dinosaurs walked about millions of years ago. And today, considering their track, we can indulge in imagination and revive these wonderful frames in our minds. The reserve also accommodates a centuries-old karst cave that expects to surprise visitors with huge stalactites and stalagmites.
